RENAULT Master XDD (H2 & H3)

NISSAN Interstar XDD (H2 & H3)

The product is made of a fibreglass frame adapted to the rear shape of the vehicle and a roller shutter. It replaces the traditional rear swing doors of the van and fits exactly the previous location of the original doors.

The installation is reversible because it doesn't require any drilling, cutting or welding of the original van bodywork.

Installation required only 3 to 4 hours.

This is the perfect solution to avoid space and safety issues for users generated by classical swing doors opening on the road.

The fibreglass frame is delivered in original white colour of the van manufacturer. The shutter could be delivered in powder coated following RAL colours or anodised finish.

The original white colour of the van manufacturer is made of spray liquid paint while the fibreglass frame is made with gelcoat. MCD cannot guarantee the perfect colour matching of both process, some slight colour difference could be visible.

Advantages

- **Vehicle aesthetics preserved**
- **Doesn't require any bodywork modifications** (no drilling, cutting, welding or painting to do)
- **Original doors can be restored**
- **Simple and quick installation time (3 to 4 hours only)**

BE CAREFUL

Take care to double check carefully the exact vehicle model you want to equip. Our frame is not compatible with all vehicles height available.
