Handle

Profile HANDLE

The closing of the shutter is done thanks to a profile handle with or without key locking mechanism. The second aluminium profile of the door includes a «L» shape design allowing the grip to maneuver the shutter. The door is locked in bottom position by a system of rods and cremona.

Profile HANDLE with key

Profile HANDLE without key

BE CAREFULL
Closign system only available for ALUCOFFRE shutter model

Compatibility Options/ Profile handle

	Pull strap	Interior unlocking	Sensors	Electric locking system	LED lighting
Profile handle	•		•		•

BE CAREFUL
All options are not compatible with all closing system.
