## Option

### Electric locking system

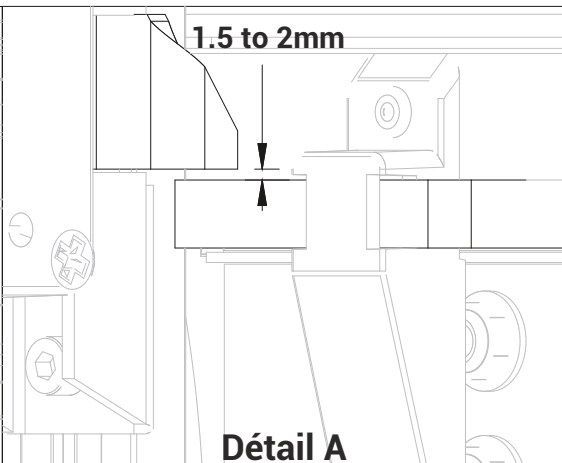

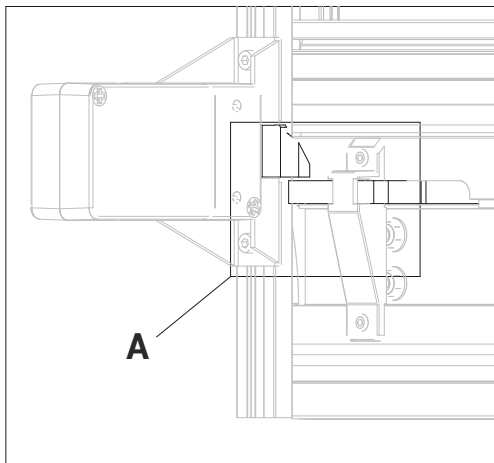

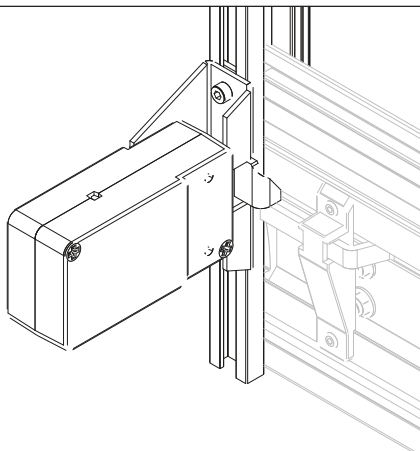

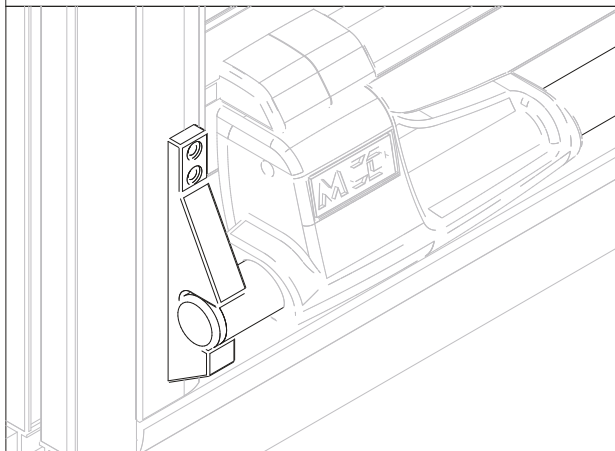

1 -> Electro-magnet

2 -> Push button

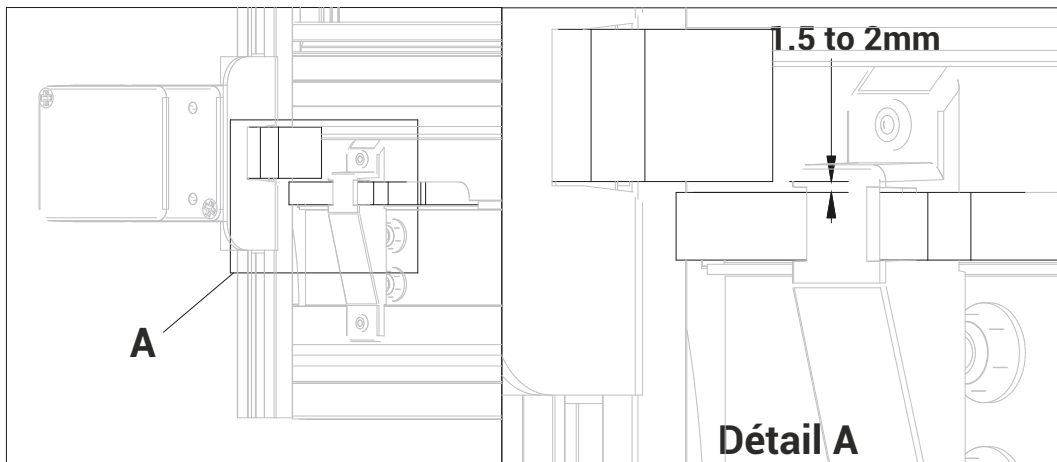

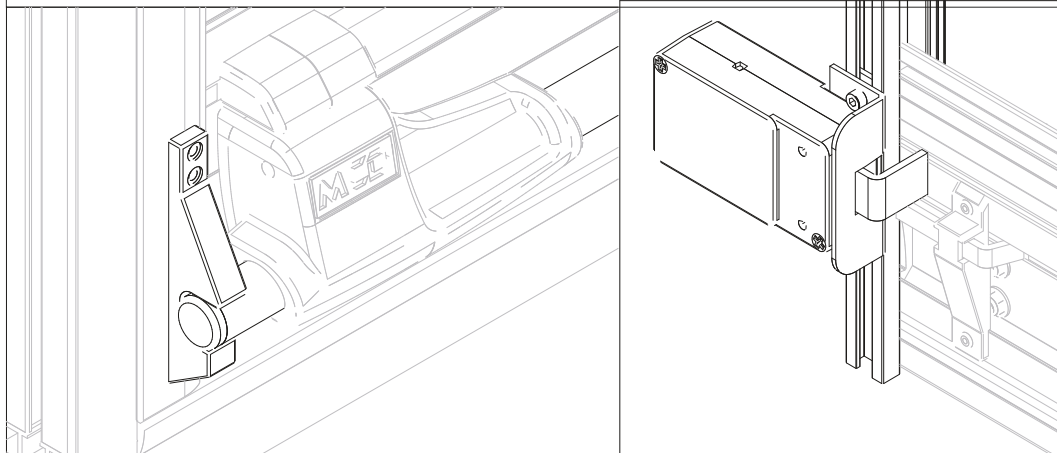

## Electric locking system - Installation perpendicular to the shutter

- 1** Close the shutter in its bottom blocking strikers. Place the electro-magnet at the rear of the tracks and put the bolt in the locked position (bolt extended). Adjust its height to have about 1.5 to 2mm of clearance between the bolt and the lockign rode of the bottom profile.

## Electric locking system - Installation parallel to the shutter

- 1 Close the shutter in its bottom blocking strikers. Place the electro-magnet at the rear of the tracks and put the bolt in the locked position (bolt extended). Adjust its height to have about 1.5 to 2mm of clearance between the bolt and the lockign rode of the bottom profile.
